

Kastaway's ~~MAGNETIC~~ DIVER

Resets without retrieving!

THE RELEASE

It's magnetic, not mechanical, and resets without retrieving. No more reeling yards of line when diver is accidentally tripped.

To RESET: Lift the rod five or six feet into the air, then quickly drop the tip, causing the line to slack. The weight of the diver will cause it to fall and reset. The tension of the release is adjustable.

DEEPEST DIVING DIRECTIONAL DIVER

Fish directly behind the boat or adjust to troll to the right or left. Our unique "Positive Lock" insures the diver will stay on track and not slip behind the boat.

The depth the diver will reach is controlled by the amount of line let out and the size of the diver you are using.

SIGHT, SOUND and SCENT

SIGHT: Bright colors or clear, KASTAWAYS DIVER can either catch the eye of fish or slip past practically invisible.

SOUND: A rattle is built into every diver, which in certain instances, will attract more fish, since sound travels best through water.

SCENT: Here's where we're truly unique. A scent pad on the fin makes it easy to apply KODIAK PASTE, creating a scent trail to your lure.

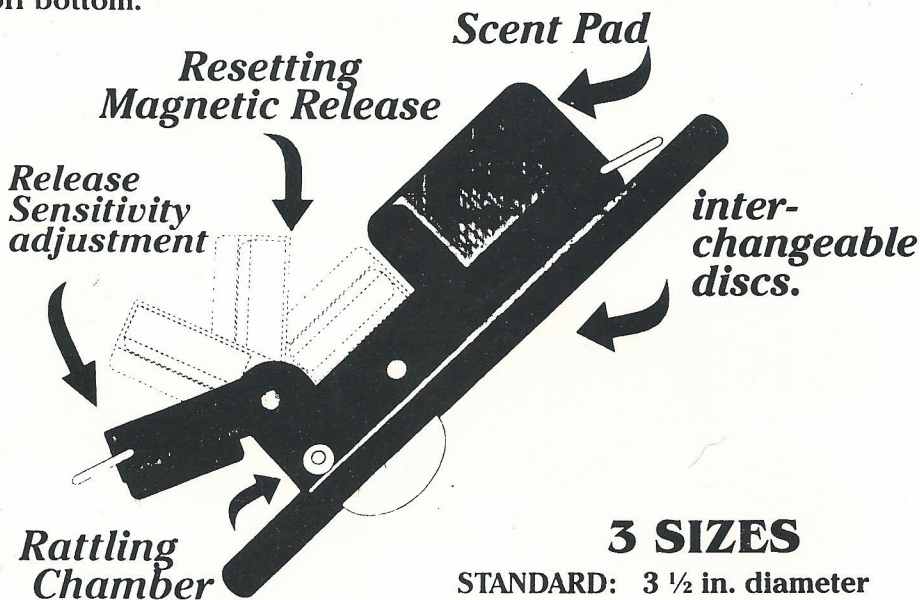

STACKED OR BOTTOM FISH

To trigger a strike, periodically trip the diver and allow it to surface automatically. Now you are fishing at various depths. This trick works great is fishing is slow.

When fish are laying on the bottom, set the diver and let it down until it hits bottom, reel in some line and let it reset. Should the diver trip again, reel in more line, reset and repeat until it runs just off bottom.

DOWN and AWAY

Want to fish a greater area of water? With some minor adjustments, KASTAWAY'S SUPER MAG DIVER can be used as an in-line planer. Simply remove the metal plate from the flipper, disabling the release. The diver will more out to the right or left, and put your bait below the surface.

MANY COLORS

STANDARD COLORS:

Clear Black Orange
Purple Green Chartreuse

METALLIC COLORS:

Chrome

3 SIZES

STANDARD: 3 1/2 in. diameter
maximum depth 50'

MAGNUM: 4 3/4 in. diameter.
maximum depth 60'

SUPER MAG: 5 in. diameter
maximum depth 70'

INTERCHANGEABLE DISCS

Change size... change color!
Any size disc will work with any
size diver.
